Notes to Ind AS financial statements for the year ended March 31, 2022

**1. Corporate Information**

ICC Realty (India) Private Limited ("the Company") is a private limited company domiciled in India and was incorporated on February 12, 2002 under the provisions of the Companies Act, 1956 engaged in the business of leasing of commercial spaces, operation of a retail mall, operation of a commercial hotel and operation of windmills.

The financial statements of the company for the year ended March 31, 2022 were authorized for issue in accordance with a resolution of the Board of Directors on May 30, 2022.

**2. Summary of significant accounting policies**

**2.1 Basis of Preparation**

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act 2013 (IND AS complain Schedule III), as applicable.

The financial statements have been prepared on a historical cost basis, except for certain financial instruments which have been measured at fair value or revalued amount at the end of each reporting period, as explained under accounting policy 2.13

Accounting policies have been consistently applied to all the years presented except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

**2.2 Current versus non-current**

The Company presents assets and liabilities in the Balance Sheet based on current/non-current classification.

An asset is classified as a current asset when it is either:

- ▶ Expected to be realized or intended to sold or consumed in the normal operating cycle;
- ▶ Held primarily for the purpose of trading;
- ▶ Expected to be realized within twelve months after the reporting period; or
- ▶ Cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current assets.

A liability is classified as a current liability when either:

- ▶ It is expected to be settled in the normal operating cycle;
- ▶ It is held primarily for the purpose of trading;
- ▶ It is due to be settled within twelve months after the reporting period; or
- ▶ There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current. Deferred tax assets/ (liabilities) are classified as non-current assets/ (liabilities).

The Operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalent. The Company has identified twelve months as its operating cycle.

### 2.3 Fair value measurement

The Company measures financial instruments, such as non-current and current investments, at fair value, at each balance sheet date. Fair-value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed in Note 38.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above.

This note summarizes accounting policy for fair value. Other fair value related disclosures are given in the relevant notes

- Significant accounting judgements, estimates and assumptions
- Quantitative disclosures of fair value measurement hierarchy
- Investment properties
- Financial instruments (including those carried at amortized cost)

The Company's management determines the policies and procedures for both recurring fair value measurement, such as unquoted financial assets measured at fair value, and for non-recurring measurement, such as non-current assets held for sale.

External valuation experts are involved for valuation of significant assets and liabilities. Involvement of external valuation experts is decided upon annually by the management.

### 2.4 Revenue from contract with customers:

Revenue is recognized at an amount that reflects the consideration to which the Company expects to be entitled in exchange for transferring the goods or services to a customer i.e. on transfer of control of the goods or service to the customer. Revenue from sales of goods or rendering of services is net of indirect taxes, returns and discounts. The disclosures of significant accounting judgements, estimates and assumptions relating to revenue from contracts with customers are provided in Note 23.

(i) Hotel operations

**Rooms, Food, Beverage and other allied hotel services including banquet services:**

Revenue is recognized at the transaction price that is allocated to the performance obligation. Revenue includes room revenue, food and beverage sale and banquet services which is recognized once the rooms are occupied, food and beverages are sold and banquet services have been provided as per the contract with the customer.

In relation to other allied hotel services, the revenue has been recognized by reference to the time of service rendered.

(ii) Commercial leasing:

**Rental income from investment property:**

Rental income from property leased under operating lease is recognized in the income statement on a straight-line basis over the term of the lease unless increase in rentals are in line with expected general inflation. The lease term is the non-cancellable period together with any further term for which the tenant has the option to continue the lease, where, at the inception of the lease, the Company is reasonably certain that the tenant will exercise that option. The Company collects Service tax/Goods and service tax on behalf of the government and therefore, it is not an economic benefit flowing to the Company. Hence, it is excluded from revenue. Contingent rents if any are recognized as revenue in the period in which they are earned.

**Maintenance and service charges:**

Maintenance and service charges arising from operating leases are recognized as and when the services are rendered.

**Other activities incidental to commercial leasing:**

Other activities incidental to commercial leasing is recognized as and when the services are rendered and are shown net of expenses i.e. electricity expenses.

**Sale of construction material, including fitout sale:**

Revenue from sale of construction materials is recognized when control of the goods have been transferred to the customer.

The Company collects sales taxes and value added taxes, GST on behalf of the government and, therefore, these are not economic benefits flowing to the Company. Hence, they are excluded from revenue.

**Variable Consideration:**

If the consideration in a contract includes a variable amount (like volume rebates/incentives, cash discounts etc.), the Company estimates the amount of consideration to which it will be entitled in exchange for rendering the services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved. The estimate of variable consideration for expected future volume rebates/incentives, cash discounts etc. are made on the most likely amount method. Revenue is disclosed net of such amounts.

**Contract balances**

**Trade receivables**

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policy no. 2.13 Financial instruments – Financial assets at amortized cost.

**Contract liabilities**

A contract liability is the obligation to render services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company renders services to the customer, a contract liability is recognized when the payment is made. Contract liabilities are recognized as revenue when the Company performs under the contract.

Notes to the Ind AS financial statements for the year ended March 31, 2022

**Refund liabilities**

A refund liability is the obligation to refund some or all the consideration received (or receivable) from the customer and is measured at the amount the Company ultimately expects it will have to return to the customer. The Company updates its estimates of refund liabilities (and the corresponding change in the transaction price) at the end of each reporting period.

**2.5 Foreign currencies**

The Company's financial statements are presented in Indian Rupees ('INR'), which is its functional currency and presentation currency; the currency of primary economic environment in which company operates.

**2.5.1 Transactions and balances**

**Initial recognition:** Transactions in foreign currency are initially recorded at the functional currency spot rate of exchange at the date the transaction first qualifies for recognition.

**2.5.2 Translation and exchange differences**

**Monetary items:** Monetary assets and liabilities denominated in foreign currencies are translated at their respective functional currency exchange rate prevailing at the reporting date. Exchange differences arising on settlement or translation of monetary items are recognized in statement of profit and loss.

**Non-monetary items:** Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rates at the dates of initial recognition. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in Other Comprehensive Income ('OCI') or profit and loss are also recognised in OCI or profit or loss, respectively).

**2.6 Taxes**

**2.6.1 Current income tax**

Current income tax assets and liabilities are measured at the amounts expected to be recovered from or paid to the taxation authorities; on the basis of the taxable profits computed for the current accounting period in accordance with Income Tax Act, 1961. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date.

Current income tax relating to items recognized in other comprehensive income or directly in equity is recognized in other comprehensive income or in equity, respectively, and not in the Profit and Loss. The Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

**2.6.2 Deferred Tax**

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences.

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit and loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity.

The Company offsets deferred tax assets and deferred tax liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority.

## 2.7 Property, plant and equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Capital work in progress is stated at cost, net of accumulated impairment loss, if any. Cost comprises of purchase price, directly attributable cost of bringing the asset to its working condition for the intended use and borrowing costs, if the recognition criteria are met.

The cost also include initial estimate of decommissioning, restoring and similar liabilities. Any trade discount or rebate are deducted in arriving at purchase price. Such cost include the cost of replacing parts of property, plant and equipment.

When significant parts of property, plant and equipment are required to be replaced at intervals; the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in the statement of profit and loss as incurred.

CWIP comprises of cost of property plant and equipment that are not yet ready for intended use as at balance sheet date.

Depreciation is calculated on a written down value basis using the rates arrived at, based on the management's estimated useful lives. The identified components are depreciated separately over their useful lives; the remaining components are depreciated over the life of the principal asset. The Company has used the following useful lives to provide depreciation on its property, plant and equipment.

Assets	Useful Life Estimated by the Management (years)		
	IT Park	Hotel	Mall
Building	58	30	58
Building façade	30	-	30
Plant and Equipment	20	20	15
Electrical Installations	20	20	10
Furniture and Fixtures	15	10	10
Computers	6	6	6
Computer Software	3-10	3-10	3
Office Equipment	20	20	5
Windmills	18	-	-
Vehicles	10	10	-

The management has estimated the useful lives of the following classes of assets:

- The useful lives of buildings are estimated as 30 years, for hotel. These lives are lower than those indicated in schedule II.
- Plant and machinery, electrical installations and office equipment are depreciated over the estimated useful lives of 20 years for IT Park and Hotel, which are higher than those indicated in schedule II.
- The useful lives of furniture and fittings are estimated as 15 years for IT Park. These lives are higher than those indicated in schedule II.
- Computers and vehicles are depreciated over the estimated useful lives of 6 years and 10 years respectively, which are higher than those indicated in schedule II.
- Windmills are depreciated over the estimated useful lives of 18 years which is lower than those indicated in schedule II.
- Computer software has different lives ranging between 3-10 years based on their useful lives.

An item of property, plant and equipment and any significant part initially recognised is de-recognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognised.

The management undertakes a review of the residual values, useful lives and methods of depreciation of property, plant and equipment at the end of each reporting period and adjustments are made whenever necessary.

## 2.8 Investment property

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any.

The cost includes the cost of replacing parts and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of the investment property are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognised in profit or loss as incurred.

The Company, based on technical assessment made by technical expert and management estimate, depreciates the building over estimated useful lives which are different from the useful life prescribed in Schedule II to the Companies Act, 2013. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

The Company depreciates building component of investment property over 58 years from the date of original purchase.

Though the Company measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes. Fair values are determined based on an annual evaluation performed by an accredited external independent valuer applying a valuation model recommended by the International Valuation Standards Committee.

Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the period of de recognition.

## 2.9 Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at the inception date. The arrangement is assessed for whether fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

### 2.9.1 Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

## 2.10 Borrowings costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

**2.11 Intangible assets**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses, if any.

Intangible assets with finite useful lives are amortised over their useful economic lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss in the expense category consistent with the function of the intangible assets.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

**2.12 Inventories**

Inventory of food, beverages and tobacco are valued at lower of cost and estimated net realizable value. Cost is determined on a weighted average basis. Cost include cost of purchase including duties and taxes (other than refundable), inward freight, and other expenditure directly attributable to the purchase.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

**2.13 Financial instruments**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

**2.13.1 Financial assets****2.13.1.1 Classification**

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost or at fair value through profit and loss ('FVTPL').

**2.13.1.2 Initial recognition and measurement**

Financial assets are recognised initially at fair value plus, in the case of financial assets not classified as fair value through profit or loss ('FVTPL'), transaction costs that are attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss financial assets and financial liabilities are recognised in the Balance Sheet when the Company becomes a party to the contractual provisions of the instrument. A regular way purchase or sale of financial assets shall be recognised using trade date or settlement date accounting.

**2.13.1.3 Subsequent measurement**

For purposes of subsequent measurement, financial assets are classified in two categories:

- a) At amortised cost
- b) At fair value through profit or loss ('FVTPL')

**(a) Financial assets classified as measured at amortised cost**

A financial asset shall be measured at amortised cost if both of the following conditions are met: the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate ('EIR') method, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance expense/

## Notes to the Ind AS financial statements for the year ended March 31, 2022

(income) in the profit and loss statement. The losses arising from impairment are recognised in the statement of profit and loss. This category generally applies to trade receivables, security and other deposits receivable by the company.

**(b) Financial assets classified as measured at FVTPL**

A Financial asset shall be measured at FVTPL, unless it is measured at amortised cost or at FVOCI. The Company classifies all equity or puttable financial instruments held for trading as measured at FVTPL. Such instruments are measured at fair value at initial recognition as well as at each reporting date. The fair value changes are recognised in the statement of profit and loss eg mutual fund. Further, the Company may make an irrevocable election to designate a financial asset as FVTPL, at initial recognition, to reduce or eliminate a measurement or recognition inconsistency.

Equity instruments: All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognized by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument- by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

**2.13.1.4 De-recognition**

A financial asset (or, where applicable, a part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's Balance Sheet) when the rights to receive cash flows from the asset have expired; or the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

**2.13.1.5 Impairment of financial assets**

In accordance with Ind-AS 109, The Company applies expected credit loss ('ECL') model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- ▶ Financial assets measured at amortised cost
- ▶ Trade receivables

The Company follows 'simplified approach' for recognition of impairment loss allowance on Trade receivables.

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12 month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original effective interest rate (EIR). When estimating the cash flows, an entity is required to consider all contractual terms of the financial instrument over the expected life of the financial instrument.

## Notes to the Ind AS financial statements for the year ended March 31, 2022

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the Statement of Profit and Loss. This amount is reflected under the head 'other expenses' in the Statement of Profit and Loss. The balance sheet presentation for various financial instruments is described below:

Financial assets measured at amortized cost, revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments based on shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The impairment loss/ (gain) is recognised in the statement of profit and loss, except for impairment loss/ (gain) on financial assets measured at FVOCI, which shall be recognised in the OCI.

### 2.13.2 Financial liabilities

#### 2.13.2.1 Classification

Financial liabilities are classified, at initial recognition, as subsequently measured at amortised cost or at fair value through profit or loss ('FVTPL').

#### 2.13.2.2 Initial recognition and measurement

Financial liabilities are recognised initially at fair value net of, in the case of financial liabilities not classified as fair value through profit or loss ('FVTPL'), transaction costs that are attributable to the issue of the financial liability. Financial assets and financial liabilities are recognised in the Balance Sheet when the Company becomes a party to the contractual provisions of the instrument.

#### Financial liabilities at amortised cost

This is the most relevant category to the Company. The Company generally classifies interest bearing borrowings as financial liabilities carried at amortised cost. After initial recognition, these instruments are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in statement of profit and loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

#### 2.13.2.3 De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

### 2.13.3 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

### 2.14 Impairment of non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those

Notes to the Ind AS financial statements for the year ended March 31, 2022

from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset. In determining the fair value less costs to disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded subsidiaries or other available fair value indicators.

**2.15 Cash and cash equivalents**

Cash and cash equivalents comprise cash on hand, balances with banks and short-term deposits with a maturity of three months or less, which are subject to an insignificant risk of changes in value.

Cash equivalents are short term, highly liquid investments that are readily convertible into known amounts of cash and are subject to an insignificant risk of changes in value.

In the statements of cash flows, cash and cash equivalents consist of cash and short term deposits, as defined above net of outstanding bank overdrafts as they are considered as integral part of the Company's cash management.

**2.16 Segment reporting**

An operating segment is a component of a company whose operating results are regularly reviewed by the Company's chief operating decision maker (CODM) to make decisions about resource allocation and assess its performance and for which discrete financial information is available. The Company has identified the Board of Directors of the Company as its CODM.

**2.17 Provisions**

Provisions are recognised when the Company has a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

**2.18 Government Grants**

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with.

Grants related to income are presented as part of profit or loss, they are deducted in reporting the related expense.

**2.19 Contingent liability**

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company.

A contingent liability can arise for obligations that are possible, but it is yet to be confirmed whether there is present obligation that could lead to an outflow of resources embodying economic benefits.

The Company also discloses contingent liability when it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or a sufficiently reliable estimate of the amount of the obligation cannot be made.

The Company does not recognise a contingent liability but only makes disclosures for the same in the financial statements.

## Notes to the Ind AS financial statements for the year ended March 31, 2022

**2.20 Provision for employment benefits****2.20.1 Defined contribution plans**

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contributions payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as an expenditure in the statement of profit and loss, when an employee renders the related service.

**2.20.2 Defined benefit plans**

Post-employment benefit in the form of gratuity fund scheme is a defined benefit plan. The present value of obligation under the scheme is determined based on actuarial valuation using the projected unit credit method ('PUCM'). The scheme is non-funded.

Re-measurements, comprising of actuarial gains and losses and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to the statement of profit and loss in subsequent periods.

Past service costs are recognised in the statement of profit and loss on the earlier of:

- ▶ The date of the plan amendment or curtailment and
- ▶ The date on which the Company recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation under 'employee benefit expenses' in the statement of profit and loss:

- ▶ Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements
- ▶ Net interest expense or income

Refer Note 34 for additional disclosures relating to Company's defined benefit plan.

**2.20.3 Provision for compensated absences**

Provision for short term compensated absences is recognised for accumulated leaves that are expected to be utilized within a period of twelve months from the balance sheet date. Long term compensated absences are provided for on the basis of an actuarial valuation, using projected unit credit method, as at each reporting date. The Company recognises the entire changes in net defined benefit obligation, including re-measurements in the statement of profit and loss for the year.

**2.21 Earnings per share (EPS)**

Basic and diluted earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

**2.22 Other income****Interest Income:**

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate ('EIR') applicable. For all financial instruments measured at amortized cost, interest income is recorded using the effective interest rate (EIR). The EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset. Interest income is included in other income in the statement of profit and loss.

**Dividends:**

Dividend income is recognized when the Company's right to receive dividend is established by the reporting date. Dividend income is included under the head 'Other income' in the statement of profit and loss.

### 3. Significant accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of asset or liability affected in future periods.

#### Judgements

In the process of applying the accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

#### Operating lease commitments – Company as lessor

The Company has entered into commercial property leases on its investment property portfolio. The Company has determined, based on an evaluation of the terms and conditions of the arrangements, such as the lease term not constituting a major part of the economic life of the commercial property and the fair value of the asset, that it retains all the significant risks and rewards of ownership of these properties and accounts for the lease contracts as operating leases.

#### Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the Company's control. Such changes are reflected in the assumptions when they occur.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the year ending March 31, 2022 is included in the following notes -

#### Defined benefit plans (gratuity benefits)

The cost of the defined benefit gratuity plan and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation.

The mortality rate is based on publicly available mortality tables. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases and gratuity increases are based on expected future inflation rates.

Further details about gratuity obligations are given in Note 34.

#### Standards issued but not yet effective

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards.

There is no such notification which would have been applicable from April 1, 2022.

#### Others

Certain tenants have not paid service tax charged by the Company on lease rents during the year ended March 31, 2010 and March 31, 2011 and disputed levy of service tax through 'Retailers Association'. In said case, Hon'ble Supreme Court has vide order dated October 14, 2011, directed the service receivers to deposit 50% of tax liability in three installments and granted stay on balance dues and the matter is sub judice.

Based on legal advice, the Company is no longer liable to pay service tax in present case as the service receivers were directed by Hon'ble Supreme Court to pay the service tax and matter is sub judice.

Accordingly, the Company will adjust service tax liability remaining outstanding as at March 31, 2022 of Rs. 72.22 Lacs (March 31, 2021 of Rs. 72.22 Lacs) with corresponding trade receivables on the basis of evidence of service tax payments provided by tenants."

Description of valuation techniques used and key inputs to investment properties :

Investment Property	Valuation techniques	Significant unobservable inputs	Range (weighted average)	
			As at March 31, 2022	As at March 31, 2021
	Market Method	Leasable area Rate adopted	1325320 sft Rs. 18000-36000 per sft	1,319,040 sft Rs. 17500-35500 per sft

Description of valuation Method

These valuations are based on valuations performed by Thite Valuers & Engineers Pvt. Ltd., an accredited independent and registered valuer as defined under rule 2 of Companies (Registered Valuers and Valuation) Rules, 2017. The valuation was conducted through a market rate approach. Under this approach the market value has been obtained by considering the sale consideration of the similar properties. Under this method average rate has been obtained from various sale instances for similar properties after adjusting various positive and negative factors associated with the property under valuation. For constructed properties depreciation market rate is taken for valuation.

<b>At the effective income tax rate of 18.31% [March 31, 2021: 27.01%]</b>		
<b>Income tax expense reported in the statement of profit and loss</b>	<b>659.48</b>	<b>209.21</b>

## Statement of Balance sheet section

Particulars	Balance sheet	
	March 31, 2022	March 31, 2021
Accelerated depreciation for tax purpose	(5,179.63)	(5,181.13)
Tax losses	7,497.77	6,904.44
Provision for gratuity	40.99	40.67
Provision for bonus	39.32	53.48
Provision for leave encashment	13.94	7.62
Provision for bad and doubtful debts	113.51	105.05
Fair valuation of security deposit	(220.93)	(121.02)
Fair valuation of investments in mutual fund	(0.04)	(1.58)
Deferred income on fair valuation of security deposit	220.88	111.27
Unbilled revenue	(271.66)	(290.59)
Others	(4.65)	-
Deferred tax related to OCI items	(7.83)	(9.93)
<b>Net deferred tax expense/(income)</b>	-	-
<b>Net deferred tax assets/(liabilities)</b>	<b>2,241.67</b>	<b>1,618.28</b>
<b>Net deferred tax assets recognised in Balance Sheet*</b>	-	-

## Reflected in the balance sheet as follows

	March 31, 2022	March 31, 2021
Deferred tax liability	(5,684.73)	(5,604.25)
Deferred tax assets	5,684.73	5,604.25
<b>Deferred tax assets (net)</b>	-	-

Tax losses and MAT credit available for set off against future taxable profits of the company are mentioned below:

Particulars	31st March 2022		31st March 2021	
	Amount	Offsetting maximum period	Amount	Offsetting maximum period
Specified Business losses	25,748	Indefinite	24,870	Indefinite
<b>Minimum Alternate Tax Credit</b>				
A.Y. 2018-19			107.11	31st March 2033
A.Y. 2019-20	436.61	31st March 2034	847.11	31st March 2034

Deferred tax assets have not been recognized in respect of these losses and MAT credit as they may not be used to offset taxable profits and there are no other tax planning opportunities or other evidence of recoverability in the near future. If the Company were able to recognize all unrecognized deferred tax assets, the loss would decrease by Rs. 7,624.91 lacs (31 March 2021: 7,424.66) lacs.

The Company offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

\* In view of there being no reasonable probability for availability of sufficient future taxable income against which the deferred tax assets as at March 31, 2022 can be realised, the same has not been recognised. Accordingly, tax asset has been recognised only to the extent of deferred tax liability.

## Note 32. Segment Information

(i) Revenue from hotel operations - Revenue from hotel operation comprise of revenue from sale of room, food and beverages and allied services related to hotel operation, including income from telecommunication and internet services.

(ii) Revenue from leasing - Revenue from leasing operations comprises of lease rentals from the properties given under lease.

(iii) Revenue from windmill - Revenue is recognised when all the significant risk and rewards of ownership have been passed to the buyer which is usually on credit provided for transmission of electricity based on the data provided by the Maharashtra State Electricity Distribution Company Limited in electricity bills.

Borrowings	19,082.77	9,953.79
Other unallocated liabilities	40,025.99	43,856.18
Total liabilities	1,874.02	2,441.04
	60,982.78	56,251.01

Note 39. Disclosure pursuant to Employee benefits  
 A. Defined benefit plans:

The Company operates a defined benefit gratuity plan. Under the gratuity plan, every employee who has completed at least five years of service gets a gratuity on departure at 15 days of last drawn salary for each completed year of service. The scheme is non-funded.

Changes in defined benefit obligation and plan assets as at March 31, 2022

	April 1, 2021		Gratuity cost charged to statement of profit and loss		Sub-total included in statement of profit and loss	Benefit paid (including amounts included in net interest expense)	Return on plan assets (excluding amounts included in net interest expense)	Remeasurement gains/(losses) in other comprehensive income		Sub-total included in OCI	Contributions by employer
	Service cost	Transfer in /Out	Net interest expense	Actuarial changes arising from changes in demographic assumptions				Actuarial changes arising from changes in financial assumptions	Experience adjustments		
Gratuity	(139.66)	(37.23)	(6.89)	(44.12)	16.14			(0.70)	(1.30)	26.88

Total benefit liability	(139.66)	(37.23)	(6.89)	(44.12)	16.14			(0.70)	(1.30)	26.88	

Changes in defined benefit obligation and plan assets as at March 31, 2021

	April 1, 2020		Gratuity cost charged to statement of profit and loss		Sub-total included in statement of profit and loss	Benefit paid (including amounts included in net interest expense)	Return on plan assets (excluding amounts included in net interest expense)	Remeasurement gains/(losses) in other comprehensive income		Sub-total included in OCI	Contributions by employer
	Service cost	Transfer in /Out	Net interest expense	Actuarial changes arising from changes in demographic assumptions				Actuarial changes arising from changes in financial assumptions	Experience adjustments		
Gratuity	(129.41)	(44.98)	(7.29)	(52.27)	7.92			(0.49)	(2.19)	36.78	
Defined benefit obligation	(129.41)	(44.98)	(7.29)	(52.27)	7.92			(0.49)	(2.19)	36.78	
Fair value of plan assets	(129.41)	(44.98)	(7.29)	(52.27)	7.92			(0.49)	(2.19)	36.78	
Benefit Liability	(129.41)	(44.98)	(7.29)	(52.27)	7.92			(0.49)	(2.19)	36.78	
Total benefit liability	(129.41)	(44.98)	(7.29)	(52.27)	7.92			(0.49)	(2.19)	36.78	

The principal assumptions used in determining above defined benefit obligations for the Company's plans are shown below:  
 For Hotel Operations

	As at March 31, 2022	As at March 31, 2021
Discount rate	5.30%	4.90%
Future salary increase	6.00%	5.00%
Expected rate of return on plan assets	0.00%	0.00%
Rate of Employee Turnover	44.00%	36.00%
Mortality Rate During Employment	IALM(2012-14) ult	IALM(2012-14) ult

	As at March 31, 2022	As at March 31, 2021
Discount rate	7.00%	6.60%
Future salary increase	10.00%	9.00%
Expected rate of return on plan assets	0.00%	0.00%
Rate of Employee Turnover	9.00%	12.00%
Mortality Rate During Employment	IALM(2012-14) ult	IALM(2012-14) ult

A quantitative sensitivity analysis for significant assumption is as shown below:

	As at March 31, 2022		As at March 31, 2021	
	Sensitivity level	(increase) / decrease in defined benefit obligation (impact) for the current year	Sensitivity level	(increase) / decrease in defined benefit obligation (impact) for the current year
Discount rate	1% increase	4.31	1% increase	4.21
	1% decrease	(4.68)	1% decrease	(4.53)
Future salary increase	1% increase	(3.22)	1% increase	(3.14)
	1% decrease	3.02	1% decrease	2.98
Withdrawal rate	1% increase	0.36	1% increase	0.17
	1% decrease	(0.40)	1% decrease	(0.19)

The sensitivity analyses above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

The followings are the expected future benefit payments for the defined benefit plan:

Disclosure pursuant to Employee benefits	Year ended March 31, 2022	Year ended March 31, 2021
Within the next 12 months (next annual reporting period)	40.36	32.13
Between 2 and 5 years	79.05	85.82
Beyond 5 years	60.25	72.38
Total expected payments	179.66	190.33

Weighted average duration of defined plan obligation (based on discounted cash flows)

	Year ended March 31, 2022	Year ended March 31, 2021
Gratuity	2.48-10.58	3.38-10.05

## Note 34. Commitments and contingencies

## a. Leases

**Operating lease commitments: where the Company is the lessor**

The Company has entered into operating leases on its investment property portfolio consisting of commercial space along with interior fit-outs such as furniture and fixture, air conditioners, etc.. These leases have terms of between 1 and 5 years. Some of the leases include a clause to enable upward revision of the rental charge on an annual basis according to prevailing market conditions. There are no restrictions imposed by the lease agreement. Rental income recognised by the Company during the year is Rs.11781.76 lacs (March 31, 2021: Rs. 13,028.96 lacs).

Future minimum rentals receivable under non-cancellable operating leases are, as follows:

	As at March 31, 2022	As at March 31, 2021
Within one year	5,385.67	5,811.97
After one year but not more than five years	11,582.65	4,635.37
Above 5 years	190.75	953.76

## b. Capital commitments

Particulars	As at March 31, 2022	As at March 31, 2021
Estimated amount of contracts remaining to be executed on other account and not provided for (net of advances)	268.68	49.81

## c. Contingent Liabilities

Particulars	As at March 31, 2022	As at March 31, 2021
Contingent Liabilities	-	-

## Company as a lessee

The Company has lease contracts for leasehold office used in its operations. Lease of office generally have lease term of 15 years. The Company's obligations under its leases are secured by the lessor's title to the leased assets.

Set out below are the carrying amounts of right-of-use assets recognised and the movements during the period:

	Right of Use (ROU) Asset	Total
<b>Gross Block</b>		
As at April 1, 2021	-	-
Additions	6,392.88	6,392.88
Disposals	-	-
As at March 31, 2022	6,392.88	6,392.88
<b>Depreciation</b>		
As at April 1, 2021	-	-

Other financial liabilities	8,778.01	-	8,778.01	8,778.01
Trade payables	1,980.54	-	1,980.54	1,980.54
<b>Total</b>	<b>54,614.76</b>	<b>-</b>	<b>54,614.76</b>	<b>54,614.76</b>

The management assessed that cash and short-term deposits, trade receivables, trade payables, bank overdrafts and other current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values :

## Current investments

The Company's current investments consist of investment in units of mutual funds. The fair value of investments in mutual funds is derived from the NAV of the respective units at the measurement date.

## Fair value hierarchy

The following table provides the fair value measurement hierarchy of the Company's financial instruments measured at fair value after initial recognition:

Quantitative disclosures fair value measurement hierarchy for assets as at March 31, 2022:

	Date of valuation	Total	Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets measured at fair value					
Investments in units of mutual funds	March 31 2022	1,000.13	-	1,000.13	-
Assets for which fair value are disclosed					
Investment property	March 31 2022	3,12,132.00	-	-	3,12,132.00

Quantitative disclosures fair value measurement hierarchy for assets as at March 31, 2021 :

	Date of valuation	Total	Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets measured at fair value					
Investments in units of mutual funds	March 31 2021	1,003.24	-	1,003.24	-
Assets for which fair value are disclosed					
Investment property	March 31 2021	2,96,419.00	-	-	2,96,419.00

There were no transfers between level 1 and level 2 during the year ended March 31, 2022 and March 31, 2021.

**Note 39. Financial instruments risk management objectives and policies**

The Company's principal financial liabilities comprise trade payables, borrowings and security deposits. The main purpose of these financial liabilities is to finance the Company's operations and to support its operations. The Company's principal financial assets includes investments, trade receivables and cash and cash equivalents that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below:

**Market risk**

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk: Interest rate risk, currency risk and other price risk such as equity price risk and commodity price risk. Financial instruments affected by market risk include borrowings and investments.

The sensitivity analyses in the following sections relate to the position as at March 31, 2022 and March 31, 2021.

The sensitivity analysis have been prepared on the basis that the amount of net debt and the ratio of fixed-to floating interest rates of the debt are all constant as at March 31, 2022 and March 31, 2021.

**Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates.

**Interest rate sensitivity**

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected the Company profit before tax is affected through the impact on floating rate borrowings, as follows:

**Risk management- Interest rate sensitivity Table**

	As at March 31, 2022		As at March 31, 2021	
	Increase / decrease in basis points	Effect on profit before tax	Increase / decrease in basis points	Effect on profit before tax
INR	+ 50	(218.98)	+ 50	(243.83)
	- 50	218.98	- 50	243.83

**Credit risk**

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks, if any, Investment In mutual fund and other financial instruments.

**Trade receivables**

Customer credit risk is managed by the Company's established policy, procedures and control relating to customer credit risk management. For the fixed lease income, the billing is done in advance i.e. at the beginning of the month and for variable lease rent and other maintenance charges, the credit period provided is of 7 to 10 days. Thus there are no major trade receivable balances outstanding at the year end.

In case of hospitality business, credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment. Outstanding customer receivables are regularly monitored.

The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets disclosed in note 39.

The Company assesses at each reporting date whether a trade receivable or a group of trade receivables is impaired. The Company recognises lifetime expected credit losses for all trade receivables that do not constitute a financing transaction and which are due for more than six months. The expected credit losses are measured at an amount equal to 12 month expected credit losses or at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. The Company uses a practical expedient by computing the expected credit loss allowance for trade receivables based on a provision matrix.

Particulars	Not due	Within 120 days*	More than 120 days*	Total
March 31, 2022				
Estimated total gross carrying amount	0.28	1,585.45	820.08	2,405.82
ECL - Simplified approach	-	-	(415.79)	(415.79)
Net carrying amount	0.28	1,585.45	404.29	1,990.03

Particulars	Not due	Within 120 days*	More than 120 days*	Total
March 31, 2021				
Estimated total gross carrying amount	34.75	1,177.03	1,116.63	2,328.41
ECL - Simplified approach	-	-	(360.76)	(360.76)
Net carrying amount	34.75	1,177.03	755.87	1,967.65

\* Provision is made for receivables where recovery is considered doubtful irrespective of due date. Where an amount is outstanding for more than 365 days the Company usually provides for the same unless there is clear visibility of recovery.

**Foreign currency risk**

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency) .

**Foreign currency sensitivity**

The following tables demonstrate the sensitivity to a reasonably possible change in USD exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities.

**Particulars As at March 31, 2022**

	Change in USD rate	Amount
USD	+ 5%	(56.10)
	- 5%	56.10

**Particulars As at March 31, 2021**

	Change in USD rate	Amount
USD	+ 5%	(25.77)
	- 5%	25.77

**Liquidity risk**

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price. The Company's finance department is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risk are overseen by Senior management. Management monitors the Company's net liquidity position on a monthly and quarterly basis through its Senior management meeting and board meetings. They use rolling forecasts on the basis of expected cash flows.

The Senior management ensures that the future cash flow needs are met through cash flow from the operating activities and short term borrowings from banks.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments:

**Risk management- Liquidity risk As at March 31, 2022**

	On demand	Less than 3 months	3-12 months	1-5 years	More than 5 years	Total
<b>As at March 31, 2022</b>						
Borrowings		771.40	2,343.34	36,911.23	-	40,025.97

**Capital management**

For the purpose of the Company's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximise shareholder value.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors the capital using gearing ratio. The Company includes within net debt, interest bearing loans and borrowings, less cash and cash equivalents.

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Borrowings (Note 17 )	40,025.97	43,856.21
Less: cash and short-term and long term deposits (Note 14A and 14B)	12,099.20	8,965.22
<b>Net debt</b>	<b>27,926.77</b>	<b>34,890.99</b>
Equity share capital (Note 15)	1,071.40	1,071.40
Other equity (Note 16)	20,437.34	17,467.35
<b>Total capital</b>	<b>21,508.74</b>	<b>18,538.75</b>
<b>Capital and net debt</b>	<b>49,435.50</b>	<b>53,429.75</b>

**Gearing ratio**

56%

65%

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period.

**Note 40. Management's assessment of the Impact of COVID-19 on Company's operations**

The management has made an assessment of the impact of COVID-19 on the company's operations, financial performance and position as at and for the quarter & year ended March 31, 2022, in making the assessment management has considered the recoverability of trade receivables and other assets and also considered the external and internal information available up to the date of approval of these financial results including status of existing and future customers, cash flow projections etc and concluded that there is no significant impact which is required to be recognized in the financial results. Accordingly, no adjustments have been made to the financial statement.

**Note 41**

The Company has given waivers in respect of lease rental for various tenants during the year due to COVID -19 pandemic. Accordingly, as per IND AS 116 the Company has accounted for the waivers prospectively from the effective date of the waivers, considering any prepaid or accrued lease payments relating to the existing leases. Further, any subsequent waiver on the lease rental for the period post the reporting date is currently not ascertainable and not considered for accounting as stated above.

**Note 42. Social Security Code**

The Code on Social Security 2020 ('the Code') relating to employee benefits, during the employment and post-employment, has received Presidential assent on September 28, 2020. The Code has been published in the Gazette of India. Further, the Ministry of Labour and Employment has released draft rules for the Code on November 13, 2020. However, the effective date from which the changes are applicable is yet to be notified and rules for quantifying the financial impact are also not yet issued.

The Company will assess the impact of the Code and will give appropriate impact in the financial statements in the period in which, the Code becomes effective and the related rules to determine the financial impact are published.

**Note 43. Benami Properties Note**

The Company do not have any Benami property, where any proceeding has been initiated or pending against the Company for holding any Benami property.

**Note 44.**

(i) The Company has not advanced or loaned or invested funds to any other person(s) or entity(ies), including foreign entities (Intermediaries) with the understanding that the Intermediary shall:

- (a) directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company (Ultimate Beneficiaries) or
- (b) provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries.

(ii) The Company has not received any fund from any person(s) or entity(ies), including foreign entities (Funding Party) with the understanding (whether recorded in writing or otherwise) that the Company shall:

- (a) directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (Ultimate Beneficiaries) or
- (b) provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

**Note 45.**

The Company does not have any undisclosed income which is not recorded in the books of account that has been surrendered or disclosed as income during the year (previous year) in the tax assessments under the Income Tax Act, 1961 (such as, search or survey or any other relevant provisions of the Income Tax Act, 1961).

**Note 46. Relationship with Struck off companies**
